

CUPIDO

NANO COMPOSIT SEALANT

Protection
against dirt

Beading
effect

Self-Cleaning
barrier

It reduces your risk
of scratches

DESCRIPTION

- CUPIDO is a unique nano-composite sealant. Its formula is the bridge between a nano-ceramic product and a traditional sealant.
- The polymeric matrix generated by CUPIDO has a structure comparable to a flexible elastomer that can anchor and adhere to the surface protecting it against abrasions caused by mechanical actions (washing glove) and both acid and alkaline chemical aggression.
- CUPIDO generates a physical and chemical barrier. That is why it offers greater protection against limestone and atmospheric agents than other sealants on the market.
- CUPIDO can be applied on top of other sealant or nano waxes to maintain them. It is also recommended on super hydrophobic nano fluoropolymer protections which are usually subject to the water spot phenomenon. CUPIDO creates deep gloss and provides an excellent antistatic, self-cleaning ability.
- The duration of CUPIDO can be extended from 4 (if applied on its own) to 9 months, depending on the different combinations the detailer wishes to implement. It is indispensable for classic cars where ceramic protections cannot be used.
- CUPIDO is the result of the research and development of Mafral laboratories and has been thoroughly tested with the world's most prestigious sports car manufacturers.

INSTRUCTIONS FOR USE

Spray CUPIDO on the cold bodywork and spread it uniformly on the surface using a short-haired, micro-fibre "POLISH CLOTH". Remove excess product with our medium/long-haired "DOUBLE FACE" micro-fibre cloth. Lastly, eliminate any residue with the "TOP BUFFING" cloth. CUPIDO reaches its maximum effectiveness, protection and gloss level at least 8 hours after application. The product can be stratified after an hour. Warning: being a nano-technological product, it only adheres to the surface perfectly if it has already been decontaminated and cleaned well.

COMBINATIONS

CUPIDO + PERFÈCTA. Spray PERFÈCTA on a microfiber pad and dispense CUPIDO evenly on the surface to be treated, 40x40 cm at a time. Apply the product with the pad dampened with PERFÈCTA in a "Criss-Cross" method. Remove with a short-nap cloth and eliminate any residue with a "DOUBLE FACE" cloth. VÈNERE + CUPIDO. CUPIDO can be applied together with the VÈNERE primer booster glaze and removed together, in one step, for greater colour and gloss depth and duration.

ACCESSORIES

Spray

Short-hair
and medium/
long-hair cloth

DRYING	1 hour
CURING	8 hours
LAYERING	Yes
DURABILITY	4 - 9 months

SURFACES

Bodywork

VEHICLES

FEATURES

Physical state	Colourless liquid
pH value at 20°C	10
Density at 20°C	0,98 g/cm ³
Solubility in water	Fully miscible

AVAILABLE FORMATS
