

# PERFÈCTA 2.0

**GLOSS QUICK DETAILER  
ENHANCED COLOR DEPTH**

Silk  
effect

Safe at high  
temperatures

Protection  
against dirt

## DESCRIPTION

- ▶ **PERFÈCTA 2.0** is a fast and effective quick detailer for when you need to clean, improve the gloss, silkiness and protection of your car in a short time.
- ▶ Its refined formula quickly eliminates dirt, water stains and insect residue, it **immediately gives** the bodywork, glass, plastic, gaskets, chrome plating and everything else a silky smooth shine, even under extreme heat, conditions which can occur during outdoor summer motor-sport events. Its formula allows you to apply it quickly and easily.
- ▶ **PERFÈCTA 2.0** is compatible with **PERFÈCTA SiO2**, you can alternate them each time you wash your car, but do not use them together.
- ▶ **PERFÈCTA 2.0** is also compatible with wax, sealants or nanocoatings.
- ▶ **PERFÈCTA 2.0** can be used both on wet or dry surfaces.

## DIRECTIONS FOR USE

- ▶ Thanks to its pH 4.5, **PERFÈCTA 2.0** really helps on **wet surfaces** during the drying phase because it reduces the risk of hard water stains on the surface. It can help eliminate water stains that form during the drying phase. Spray **PERFÈCTA 2.0** on the panel while it is still wet. Be careful not to use too much. Dry the product and water in a single solution using the "SUPER DRYER" microfiber cloth.
- ▶ For **dry surfaces** you can use the product in **2 different ways**: spray it or dispensing it on a short-hair microfiber cloth and then spread it over the area to be treated, then making a finishing pass with a clean, dry, long-hair microfiber cloth.
- ▶ Spray it or dispensing it on a short-hair microfiber cloth and then spread it over the area to be treated, then make a finishing pass with a clean, dry, long-hair microfiber cloth. The second option is to spray it directly on the bodywork and spread it with a short-hair microfiber cloth, without pressing too hard, finishing by drying with a clean and dry, long-hair microfiber cloth. Any streaks that remain will be due only to an excessive use of **PERFÈCTA 2.0** or to the use of a microfiber cloth intended for wet finishing.
- ▶ **PERFÈCTA 2.0 is a concentrated product**: avoid using too much product during application. In fact, for example, for an average car, **2 sprays** for the door panels, **4 sprays** for the bonnet and **6 sprays** for the roof are enough.

## ACCESSORIES

Spray

Short-hair  
and long-hair  
cloth

## DILUTIONS

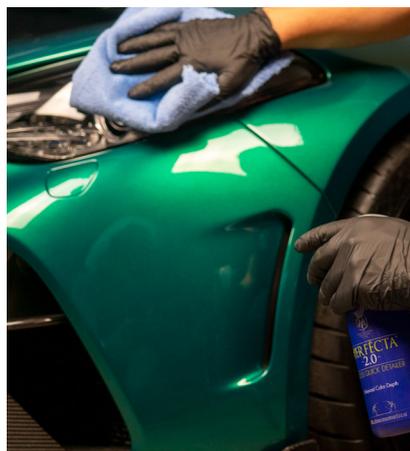

Pure

## SURFACES

Bodywork and  
External plastics

## VEHICLES

## FEATURES

Physical state	White liquid
pH value at 20°C	4,5
Density at 20°C	0,99 g/cm <sup>3</sup>
Solubility in water	Fully miscible

## AVAILABLE FORMATS
